# 1 ACCESS TO THE PLATFORM

The web address to access the Tender Platform Electronics *eLicita*Aena's is:

https://elicita.aena.es/SLE\_Internet/

The minimum requirements to access it are:

- Have an Electronic Certificate recognized by @firma installed in the Browser.
- Configuring the computer with the specific technical requirements (see *Technical Requirements Guide*)

When the user accesses the URL where it is hosted**the Electronic Tendering System** the following page will be displayed:

Electronic Tendering System *eLicita* from Aena. Quick guide for submitting bids.

Version: 1.10 September 2025

The screen that appears consists of the following components:

- 1. Access via desktop application
- 2. Access via Internet browser
- 3. Access to public consultation of tenders
- 4. At the top right of the screen, by opening the Help menu, we will find:
  - **User Manual.**This document describes the operation of the platform from the bidder's point of view.
  - **Technical requirements document**Link to a PDF document describing the technical requirements required to interact with the application.
  - **System configuration tool.**This link provides access to the platform's configuration wizard, helping you configure your device for electronic bidding.

It is necessary to perform the necessary checks on the computer configuration and also install the required components to be able to bid successfully. Without these components installed, bids cannot be submitted.

#### 1.1 Access to the Electronic Tendering System via desktop application.

In order to use the Electronic Tendering Platform *eLicita* from Aena, **One of the essential requirements is to have the desktop application installed.** 

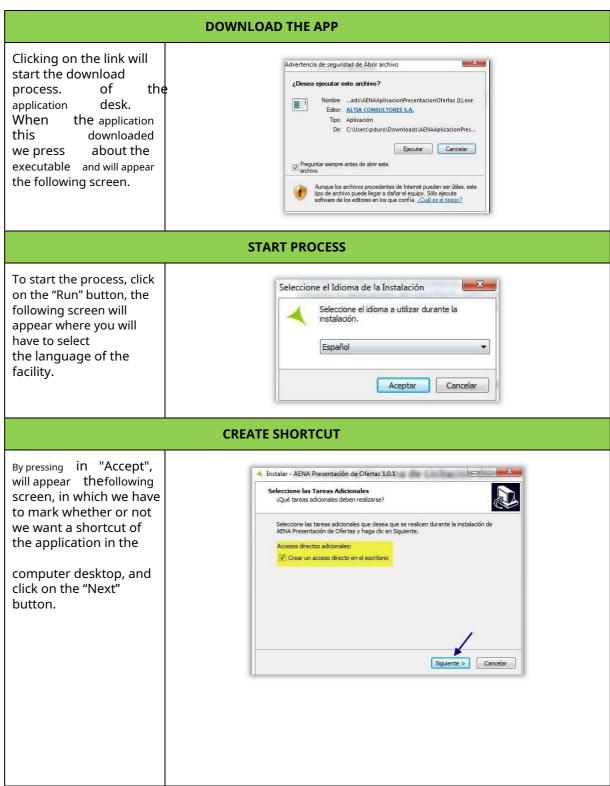

Depending on the operating system you are going to use, you will have to click on one or the other.

For specific information on how to install the desktop application on operating systems MAC, see the Technical Requirements Guide .

Version: 1.10 September 2025

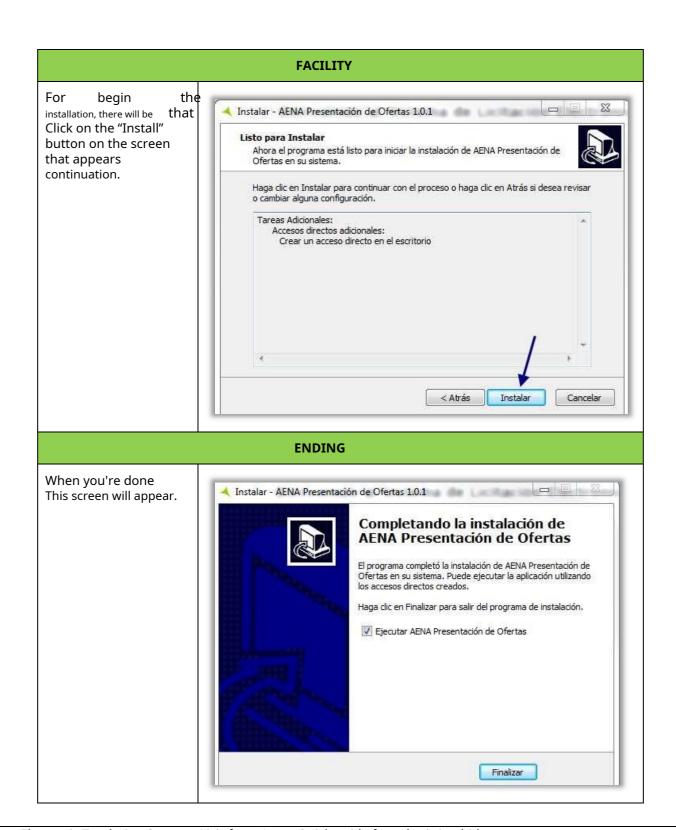

Electronic Tendering System *eLicita* from Aena. Quick guide for submitting bids.

Version: 1.10

September 2025

Electronic Tendering System *eLicita* from Aena. Quick guide for submitting bids.

Version: 1.10 September 2025

Once the Desktop Application is installed, the bidder must verify that the Autofirma application is installed. Otherwise, they will not be able to access the platform either through the Internet browser or through the Desktop Application (see<u>Technical Requirements Guide</u>).

Once the Desktop Application is installed, the bidder must verify that the Autofirma application is installed. Otherwise, they will not be able to access the Electronic Tendering Platform. *eLicita* from Aena neither through the internet browser nor through the Desktop Application (see Technical Requirements Guide).

Autofirm@ is a signature application from the Ministry responsible for this matter. This application allows users to sign documents and authenticate themselves on various websites.

Using Autofirm@ on the platform is required for any transaction you carry out, except for public tender consultations. For example:

- 1. Access the Electronic Tendering Platform *eLicita* from Aena and register any request in it.
- 2. Sign and submit the documentation in the bid submission process.
- 3. Any other operation that requires signature or sending (electronic communications and notifications).

If you do not have Autorfim@ installed, you can download it from the following link <a href="https://firmaelectronica.gob.es/Home/Descargas.html">https://firmaelectronica.gob.es/Home/Descargas.html</a>, or by accessing the home page of the Electronic Tendering System <a href="https://elicita.aena.es/SLE\_Internet/">https://elicita.aena.es/SLE\_Internet/</a>) and click on the "Install the Autofirma application" button in the section <a href="https://elicita.aena.es/SLE\_Internet/">Access via Internet browser</a>.

Version: 1.10 September 2025

When you access the Download Area, select the version of Autofirma to download based on your computer's operating system.

The contents of the downloaded file will be the Autofirma installer. Once downloaded, you must follow the steps in the installer.

The bidder must allow the execution of Autofirm@ so that**any browser** invoke its services for both the authentication and signing of offers, the sending of communications and access to electronic notifications.

Para poder acceder al Sistema de Licitación Electrónica de Aena vía web, es necesario que tenga instalado en su equipo la aplicación de firma digital MINHFP Autofirma.

Dependiendo del sistema operativo de su equipo, seleccione la versión de Autofirma para iniciar su instalación.

Autofirma para Windows 32 bit Autofirma para Windows 64 bit

Volver a la página inicial

Version: 1.10 September 2025

You can submit a bid from the desktop application as long as you are previously registered on the Electronic Tendering Platform. *eLicita* from Aena (explained in the "Quick Guide to Submitting Bids for Bidders".

# 1.2 Access to the Electronic Tendering System through the browser with an electronic certificate

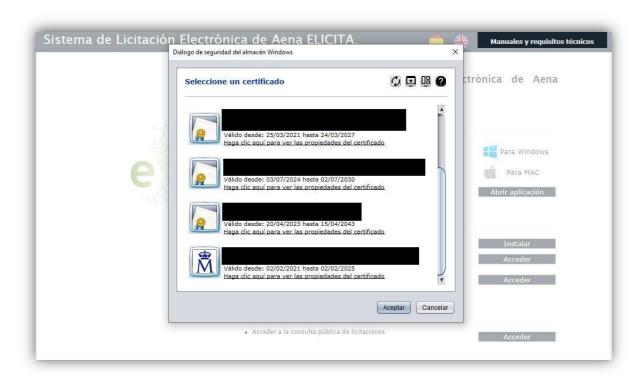

To access the Electronic Tendering System *eLicita* From Aena through the browser, the bidder must go to the main screen, having accessed the URL, and click on the "Access" button.

Once pressed, a window will appear with the electronic certificates installed in the internet browser.

Version: 1.10 September 2025

When the bidder clicks on the digital certificate with which he will access the Electronic Tendering Platform *eLicita* from Aena**validates if the user** The person being identified appears registered as a representative or authorized representative in a registration request on the platform, and therefore, in the supplier and representative management system.

Once the user is successfully authenticated, they will be able to access the Electronic Tendering System and perform the operations corresponding to their assigned role.

If the user is not registered as an agenteitherauthorized If you do not have any application for registration on the platform, you may still submit a bid. For this purpose, Quick Registration will be enabled in the GPA (Supplier and Representative Management) when you access the bid submission process for a specific file.

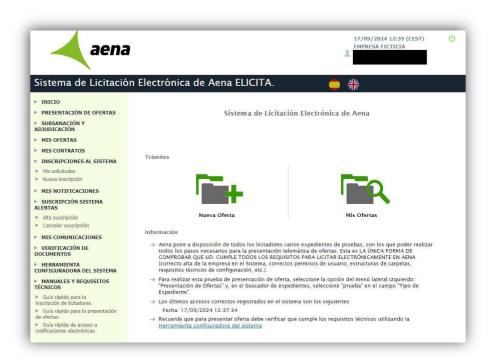

If the user also appears as a representative or authorized representative in one or more companies, upon entering the platformThe applications in which you are registered will be listed., and you must select the one with which you wish to identify yourself in the application. However, you can also select to access withanother companyIn these cases, the system's behavior toward the user will be that of a bidder not registered as a representative or authorized representative.

Version: 1.10 September 2025

Once you've selected the company, the main screen will appear, with the details for the company you've accessed in the top right corner.

Electronic Tendering System *eLicita* from Aena. Quick guide for submitting bids.

Version: 1.10 September 2025

#### 1.3 Registration and access to the system with username and password.

**This option is exclusively for foreign companies.** To access with username and password the bidder must**pre-register**.

To do this, click on the "Access" button and then click on the "Register new user" button.

The application will ask you to complete the following information, and then click the "Register" button. To confirm your registration and ensure your username is registered, you will receive an email from which you must confirm your registration. Once your registration is confirmed, you will be able to log in to the system with your username.

Version: 1.10 September 2025

Version: 1.10 September 2025

**If the bidder already has a username and password**To access, you will need to enter your email address, the password you set when registering, and the Captcha code to access.

You will be able to **reset password** at any time by clicking the "Reset Password" button and following the instructions.

In order to submit an offer, you must**REGISTER YOUR COMPANY**To do so, you can download the "quick bidder registration guide" that you will find in the "Help" menu, or go to the section of this guideStep 3. Pre-register to submit an offer (Quick Registration).

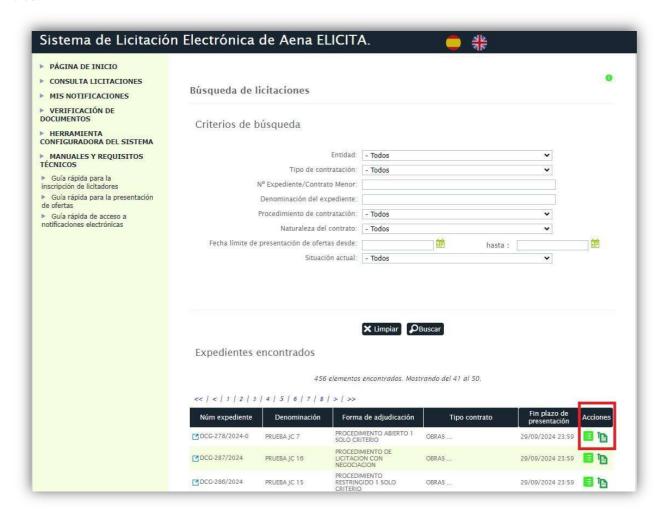

The process for the **OFFER PRESENTATION**, it will be the same regardless of whether you identify yourself with a username and password or with a digital certificate, the only change will be in the process of signing and sending the offer, which will be explained in this guide in the <u>Step 5. Sign and submit the offer.</u>

Version: 1.10 September 2025

#### 1.4 Access to public consultation of tenders

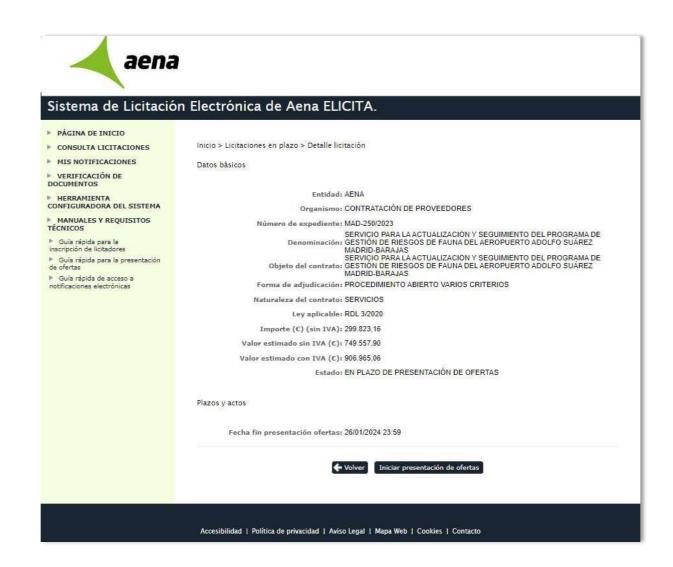

By submitting bids, bidders can view all tenders that are within the bid submission period and submit bids.

If you click on the "Actions" button for the selected file, you will access the following screen, where you must click on the "Start submission of bids" button and, after selecting the corresponding digital certificate, access the initial bid submission screen through the browser (explained in point "2. Access to the Electronic Tendering System through the browser" of this same section).

Version: 1.10 September 2025

Version: 1.10 September 2025

# 2 GUIDE FOR SUBMISSION OF OFFERS.

The steps to follow for submitting bids through Aena's eLicita Electronic Tendering Platform, using an internet browser, will be explained below.

The steps explained below are the same whether you log in with a username and password or a digital certificate.

The bidder may encounter different deadlines for submitting documentation depending on the type of tender procedure:

- Tendering of a phase

The bidder submits documentation in all envelopes at a single event.

- Two-phase tender

The bidder first submits documentation in the DA (administrative) Envelope. A subsequent submission period opens for the DT (technical documentation) and OE (economic offer) Envelopes for those bidders admitted after the first phase.

- Tender with more than two phases

The bidder submits documentation in Envelope DA. Subsequently, another period for submitting documentation opens in Envelope DT and OE for those bidders admitted after the first phase. If the bidder is admitted at the end of this second phase, they will have another period to submit their bid.

- Dynamic Acquisition Systems

The bidder must take into account the specifics of this tendering method, which requires an initial deadline for submitting bids, after which the possibility of submitting offers remains open throughout the duration of the dynamic procurement system.

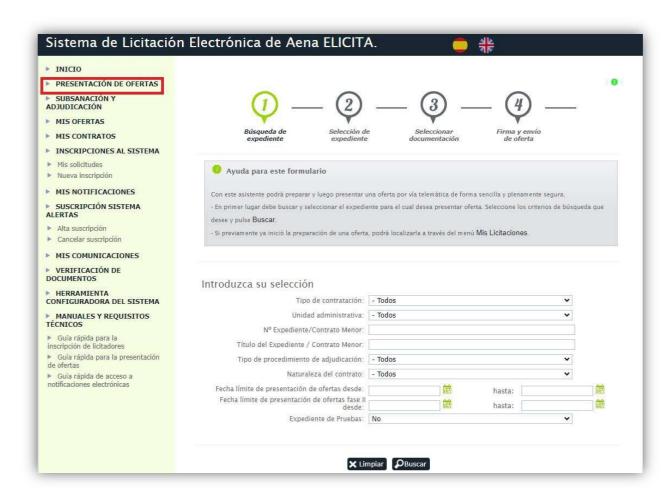

#### 2.1 Step 1. Search for the file.

To search for the file and start submitting the offer, the bidder will go to the menu on the left and click on the option **""Submission of bids."** 

Once pressed, the file search screen will appear.

Version: 1.10 September 2025

We can perform searches by applying search criteria to any of the fields that appear on the search screen, or by directly clicking the "Search" button.

By clicking on *Look for* Without any search criteria, the files that Aena has published and are within the deadline for submitting offers will be displayed.

#### 2.2 Step 2. Select file.

To start submitting the offer, you will have to select the file by clicking on it.

icon

Electronic Tendering System *eLicita* from Aena. Quick guide for submitting bids.

Version: 1.10 September 2025

If you wish to consult the tender form, you will have to click on the icon tender, the basic data of the file will be displayed, as shown in the following screen:

Version: 1.10 September 2025

#### 2.3 Step 3. Pre-registration to submit an offer (Quick Registration).

#### **PREVIOUS CONCEPTS**

If this is your first time accessing the Electronic Tendering Platform *eLicita*Aena, in the upper right corner of the screen, your first and last name will appear and the application will inform you that you do not represent any company.

In this case, when selecting the file (STEP 2. Select file), the platform will ask you for a**PRE-REGISTRATION**in order to continue with the presentation of the offer.

To register your company through Pre-Registration, you will need to complete the following mandatory information:

- Entity Details. Enter the company's details (type of business entity, tax code, company name, etc.).

  This section also includes the CPV (Company Name) subject. Clicking on the magnifying glass will reveal the categorization of all economic activities, or you can search by code or keyword to add the appropriate one. You can add one or more categories.
- Registered office. Information referring to the company's physical location (country, address, province, and postal code) will be provided.

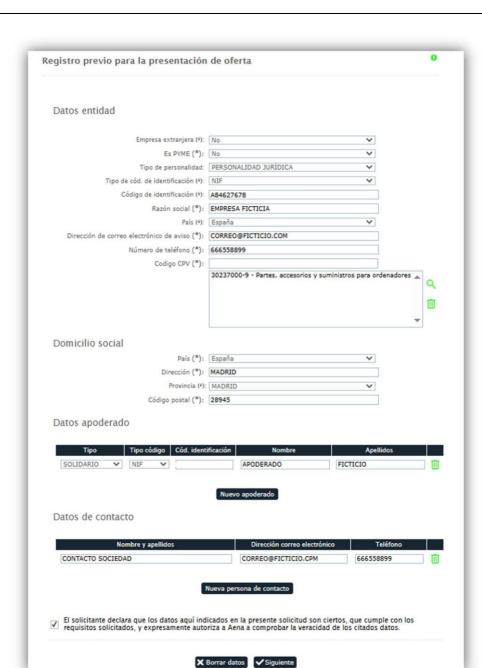

Version: 1.10 September 2025

- Contact information. Please fill out your first and last name, email address, and phone number. You can include multiple contacts. Once the information is complete, we can delete your contact information.
   by clicking on
- Representatives. Representatives' information will be automatically filled in, as the application collects it from the digital certificate with which they have identified themselves on the platform, or from their user registration if they log in with a username and password.
- Authorized parties. This section is optional. The NIF (Tax Identification Number), first name, and last name must be entered. The authorized party for the Platform is the person who can authenticate themselves in the system on behalf of the company to perform tasks such as consulting and uploading files and data to a file or registration application, but they cannot sign or submit bids. Please note that entering the authorized party's information is not mandatory.

Version: 1.10 September 2025

Once the required data has been completed, the bidder will have to check the data veracity box and click on the button

If you want to delete the completed data, click on

Version: 1.10 September 2025

Once you click "Next", as you can see on the following screen, the platform will show you your company data and the data of the representative, so you can confirm them, if any data is not correct, by clicking on the button will take you back to the pre-registration screen.

If your company information is correct, you will need to click on the button registration and access to the submission of offers for the selected file.

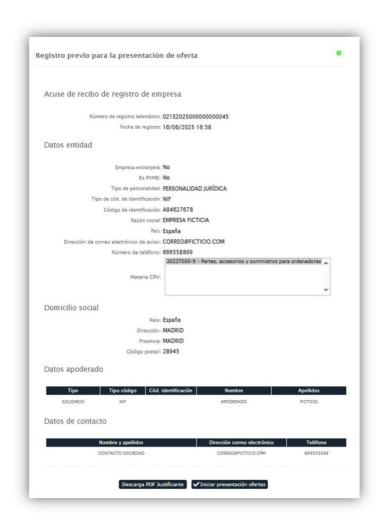

✓ Firmar solicitud to finish

Clicking the "Sign Application" button will open the Autofirm@ application, allowing you to select the digital certificate you will use to sign your company registration.

If the**registration is correct**, the following screen will appear, showing the registration number, the date and time you registered your application, and the details of both the company and the representative.

Version: 1.10 September 2025

You can also download the PDF proof of your company registration by clicking on the button Descarga PDF Justificante

If the application has been accessed with username and password, you will need to fill in the secure verification code, and click on the button Registrar solicitud.

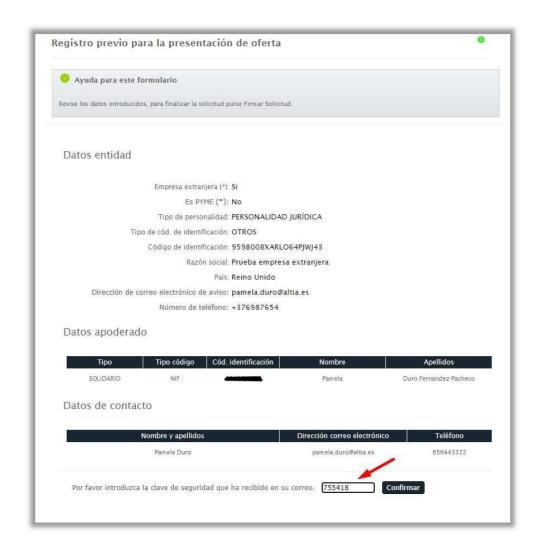

Version: 1.10 September 2025

A security code will be sent to the email address you entered when you registered your account. You'll need to complete the registration process to complete your application.

Version: 1.10 September 2025

Pressed on the button

Documentation" which we explain in STEP 4 of this guide.

The application will take us to the "Select" step.

#### **Pre-registration for UTE**

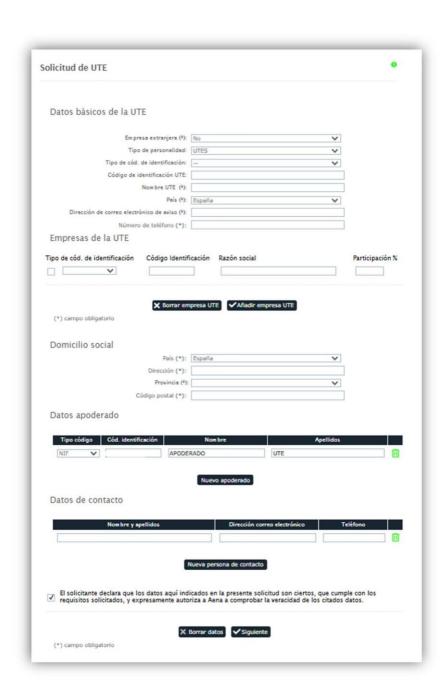

If the user selects pre-registration for a temporary employment contract, the proxy information will be automatically filled in, as the application collects it from the digital certificate used to identify the user on the platform to access the contract.

Furthermore, in order to register a UTE, the companies that form it must be previously registered on the Elicita platform. If they are not, they must first register as we reported in the Quick guide for the registration of bidders section 2. "Registration in the system).

Version: 1.10

September 2025

Once you have completed the data, you will have to check the data veracity box and click on

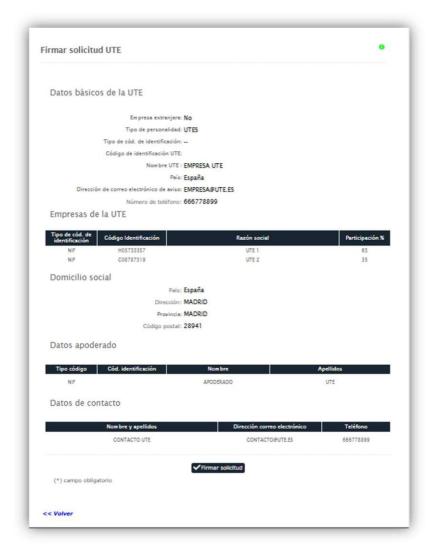

If you want to delete the completed data, click on

Version: 1.10 September 2025

As you can see on the following screen, the platform will show you a summary of the UTE details you have completed and the representative's details so you can confirm them. If any information is incorrect, clicking the Back button will take you back to the previous registration screen.

If the information is correct, you will need to click the button to access the file.

**✓** Firmar solicitud to complete the pre-registration

Clicking the "Sign Application" button will open the Autofirm@ application, allowing you to select the digital certificate you will use to sign the registration.

If the**registration is correct**, the following screen will appear showing the registration number, the date and time you registered your application, and the details of the UTE, the representative, and contact information.

Electronic Tendering System *eLicita* from Aena. Quick guide for submitting bids.

Version: 1.10 September 2025

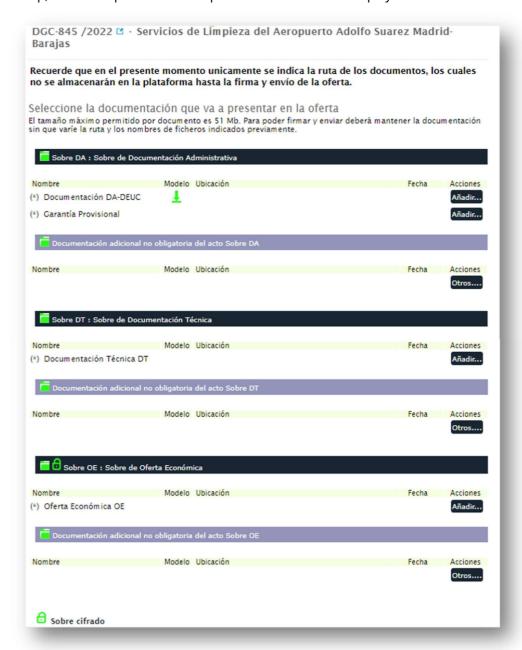

You can also download the PDF proof of registration by clicking on the button Cescarga PDF Justificante

Version: 1.10 September 2025

#### 2.4 Step 4. Select documentation.

In this step, the envelopes that make up the tender file will be displayed.

Version: 1.10 September 2025

#### MANDATORY DOCUMENTATION

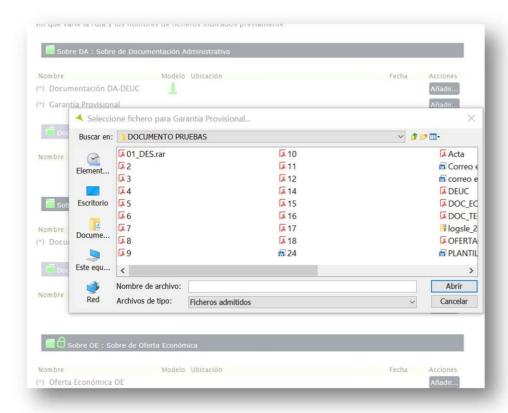

To move on to the next step and complete the submission of your bid, you will need to attach the required documents to each envelope (marked with an asterisk). To do so, please note:

- The maximum size per document is 51 Mb.
- Files attached for submitting a bid must be stored on the bidder's desktop or directly on the c:\ drive of the bidder's PC.
- The names of the attached files must not contain spaces, special characters, "ñ", or accents.
- File names must not have a maximum length of 20 characters.
- The supported file types are:

following:

. pdf,.odt,.ods,.odp,.jpg,.xsig,.zip,.docx,.xlsx,.pptx,.txt,.csv,.xml,.rar

To select a document you will have to click on the button will display a screen to select the document we want to include in the corresponding envelope.

Once the document is selected, its path and the date it was selected will be displayed.

Version: 1.10 September 2025

- By clicking on the offer You can check the signature of the document added to the documentation of the icon.-
- By clicking on the icon othe selected document will open.-
- If we want to delete the document to add another, we will click on the following icon

- If any of the mandatory documents have a form attached that must be completed, the following icon will appear in the column labeled "Form." To download the form

click on the icon -

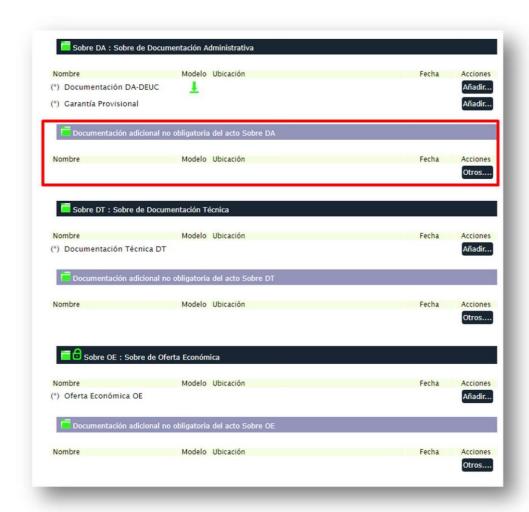

Version: 1.10 September 2025

#### **ADDITIONAL DOCUMENTATION**

For each envelope, the bidder may attach additional documentation.

To do this you will have to click on the button additionally to the envelope. For each envelope, a maximum number of additional documents to be added will be established:

- About DA: maximum 5 additional files.
- About TC: maximum 5 additional files.
- About OE: maximum 5 additional files.

Once the additional document is selected, just like with the mandatory document, we can view and delete it.

Version: 1.10 September 2025

#### NOTICES OF THE OFFER PRESENTED.

The bidder must provide an email address to which electronic notifications for the file for which they intend to submit a bid will be sent.

Additional notification emails can also be added, but this field is not required.

It is advisable that you provide additional email addresses (mailboxes or distribution lists, if possible) because the contracting unit will communicate with the bidder using these email addresses during the bidding and contract execution processes.

Once all the documents in the envelopes have been selected and an email address added electronic notification, we will click on the button in each envelope. Once saved, we can continue with the bid presentation or continue at another time (although the latter option is not recommended).

The button perform the Save action and move on to the next step: Signing and Sending the offer.

Version: 1.10 September 2025

## **Batch files:**

In this type of file, the submission of offers is carried out in the manner described above, with the following particularities:

- The lots for which a bid will be submitted must be selected so that the envelopes can be made available.
- If there are exclusive batches, a warning will appear informing you which batch is exclusive of the selected one.

## ${\bf 2.5~Step~5.~Signing~and~submitting~the~offer.}$

In Step 4. Signing and Submitting the Bid, a summary of the files and data we have attached and completed throughout the bid submission process will appear.

by clicking on the icon You will be able to check the signature of the added document.

Version: 1.10 September 2025

To enable the "Sign and Send" or "Pre-Send" button, the following checkboxes must be selected:

- It is confirmed that all offer documents have been reviewed.
- I have read and accept the legal conditions.

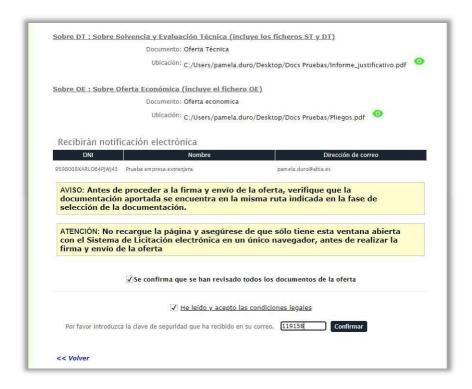

Once these conditions have been accepted, the bidder may select two options:

- Sign and send (recommended option).
- Pre-shipment (not recommended option).

**If access to the application has been made with a username and password**, you will see a secure verification code that you will need to enter to continue signing the offer.

Version: 1.10 September 2025

You will then receive the security key to your email address (the one you added when you registered as a user) so you can continue signing and submitting. You will then need to click the "Sign and Send" button to complete your offer.

Version: 1.10 September 2025

If the offer is sent correctly, the following screen will appear, from which, by clicking on the button 
The PDF receipt for the presentation of the offer will be downloaded, in which the date and time of registration of the offer will appear.

Version: 1.10 September 2025

#### 2.5.1 Signature and shipment

By clicking on *Sign and send* The "Autofirm@" application will open, and the certificate or certificates installed on your computer will appear.

- If the offer is signed and submitted using the digital certificate of the company's legal representative, it is not necessary to incorporate the files into Aena's eLicita Electronic Platform after prior signature.
- If the offer is signed and submitted using the digital certificate of a person registered as a representative on the platform, but who does not meet the requirements of the company's legal representative, the documents must be signed by the company's legal representative prior to being included on the platform.

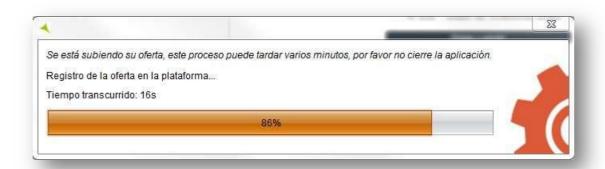

To continue with the signing and shipping process you will have to **select the certificate** with which you have been identified on the Electronic Tendering Platform *eLicita* from Aena.

Once the certificate is selected, the following will appear: **progress bar**of presentation of the offer.

Version: 1.10 September 2025

If the offer is sent correctly, the following screen will appear, from which, by clicking on the button The PDF receipt for the presentation of the offer will be downloaded, in which the date and time of registration of the offer will appear.

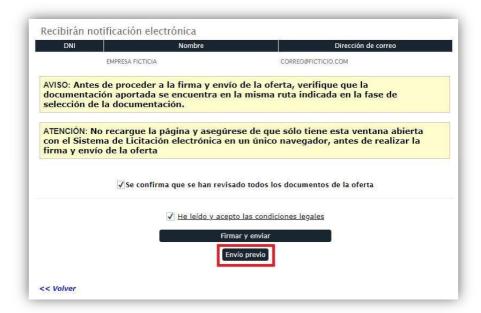

# 2.5.2 Pre-shipment

This option allows for the pre-signature submission of each and every document comprising the bid in an electronic bidding document within the maximum bid submission deadline.

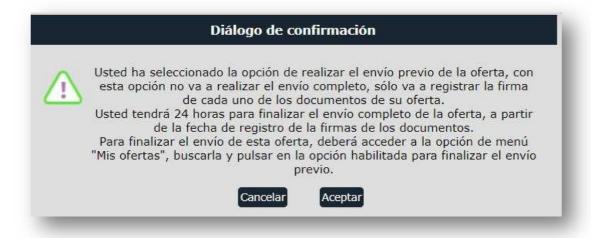

NOTE! This action does not imply submission of the offer, as it requires the subsequent submission of the complete documentation, as explained further in this section below.

Version: 1.10 September 2025

This option is useful if, for example, the bid is very large and the bidder cannot submit it within the deadline. In this case, they would use the pre-signature submission, allowing 24 hours to submit the complete documents through the platform, starting from the pre-submission.

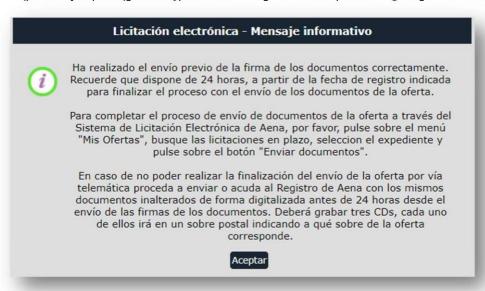

When the document signing process is successful, the system will display an informative message indicating that the offer has been successfully registered. In addition, there will also be the

Version: 1.10 September 2025

possibility of printing the receipt for acknowledgment of receipt of the offer registration....

The bidder will have the option to download the acknowledgment of receipt as a guarantee that the tender has reached the administration. It will be displayed in PDF format. Its content will include the assigned electronic registration number along with the registration date. This receipt also indicates that it is a **deferred shipping**of the tender documentation.

The company may submit the complete bid within 24 hours after sending the signature of the bid documents through the Electronic Tendering Platform. *eLicita* from Aena.

To complete the bid submission, the bidder must go to the "My Bids" section in the left-hand menu and search for the file using the available criteria. Once the file is visible, the bidder must click the pencil icon to access the bid and submit the documentation.

Version: 1.10 September 2025

Selecting this option will bring up the offer signature and submission screen with the option to finalize the submission beforehand.

When the transaction is completed successfully, the platform will display a confirmation message and allow you to download the receipt.

NOTE! If you don't complete the submission process after selecting pre-submission, your offer will not be complete.

## 2.6 Step 6. Cancellation of offer and submission of new offer

Once the bid has been submitted, and as long as the tender is within the established submission period, a new bid may be submitted to replace the one initially submitted.

To do this, click on the "My Offers" menu, search for the file for which you have already submitted an offer, and click on .

Version: 1.10 September 2025

By clicking on the icon the Electronic Tendering Platform *eLicita*Aena will launch the following confirmation message, advising that the **Submission of the new offer INVALIDATES the previously submitted offer.** 

If the bidder clicks on the "Accept" button, the platform will delete the bid that he has submitted and he will have to sign and send the new bid., following the steps explained in steps 4 and 5 of this guide.

If you click the "Cancel" button, the platform will return to the file search screen, without canceling the offer you initially submitted.

Version: 1.10 September 2025

# 3 CORRECTION OF DOCUMENTATION.

The contracting unit may request the bidder who has submitted a bid in a tender to complete or correct the documentation constituting the bid. This request will be communicated to the bidder via an email notifying the bidder of the issuance of a new electronic notification.

The steps to follow to submit the required correction documentation during the file processing process, through the Electronic Tendering Platform, are explained below. *eLicita* from Aena.

The procedure for submitting the correction documentation will be the same for correcting documents in the Administrative Documentation envelope DA, the Technical Documentation envelope DT, and the Economic Offer envelope OE.

This channel will be the only one accepted by Aena for submitting bid correction documentation.

## 3.1 Step 1. Access to correction and adjudication and file search.

You access the option of **"Correction and award" menu**, from where the search for the file for which we want to submit the required correction documentation is carried out.

We can perform the search by applying selection criteria to any of the fields that appear on the screen or by directly clicking the "Search" button without entering any other search criteria.

Version: 1.10 September 2025

## 3.2 Step 2. Documentation selection.

In this step, the bidder must attach the required documentation to the platform for correction.

# **Preliminary considerations**

- Correction documentation may only be submitted by:
  - Representatives of companies whose file documentation is in the "Pending documentation correction" status.
  - Within the date range defined by the Contracting Unit for the submission of documentation.

- File names must not have a maximum length of 20 characters.
- The maximum size per document is 51 Mb.

Once the file search is complete, click on the icon

The documentation selection screen is accessed, from where the bidder, by clicking on the "Browse" button, can attach to the platform the files with the correction documentation that he/she will submit.

Version: 1.10 September 2025

When attaching the correction documentation, the path of the documents and the dates on which they were selected are displayed on the screen.

- By clicking on the correction icon.
- You can check the signature of the document added to the documentation
- By clicking on the icon the selected document will open.
- If we want to delete the document to add another, we will click on the following icon

Version: 1.10 September 2025

Once the documents to be submitted for correction have been selected, we will click on the

button Grabar . The path of the submitted documents will be saved. Once the documents are saved, documents, we can continue with the presentation of the correction documentation or continue with it at another time (the latter option is not recommended).

The button performs the Record action and moves to the next step of *Sign and Send*the documentation submitted for correction.

## 3.3 Step 3. Signing and submitting correction documentation.

In this step, the required documentation for the correction that has been attached to the Electronic Tendering Platform is signed and sent. *eLicita* from Aena in Step 2.

#### **Preliminary considerations:**

- You will not be able to sign and submit the correction documentation until you have selected at least one file in Step 2.
- If the signature and submission of the correction is made using the digital certificate of the company's legal representative, it is not necessary to incorporate the files into Aena's eLicita Electronic Tendering Platform after having previously signed them.
- If the signature and submission of the correction is made using the digital certificate of a person registered as a representative on the platform, but who does not meet the status of legal representative of the company, the files must be signed by the company's legal representative prior to being included on the platform.

Version: 1.10 September 2025

By clicking on the icon

the documents we selected in step 2 will be displayed and

by clicking on the correction icon.

you can check the signature of the document added to the documentation  $% \left( 1\right) =\left( 1\right) \left( 1\right) \left($ 

To enable the "Sign and Send" button, you must check the box at the following link:

- I have read and accept the legal conditions.

By clicking on the button

The "Autofirm@" application will open and the following will be displayed on the screen: certificate or certificates that the bidder has installed on his/her equipment.

To continue with the process of signing and sending the correction documentation, the bidder will have to **select the certificate**with which you have been identified on the Electronic Tendering Platform *eLicita* from Aena.

Once the certificate is selected, a progress bar will appear on the screen indicating that the documents are being sent to the server.

Upon completion of the process of signing and submitting the correction documentation, the following screen will be displayed, presenting the online receipt for the registration of the submission of the correction documentation for the corresponding envelope.

Version: 1.10 September 2025

From this same screen, by clicking the "Print" button, you can download the PDF receipt for the correction documentation submitted.

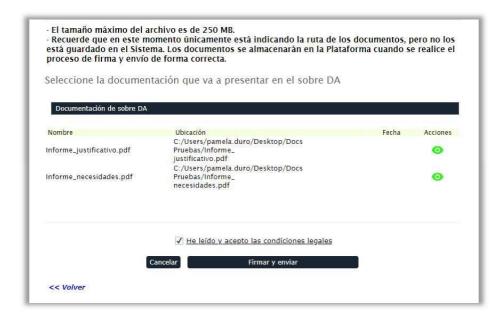

If the identification to the application has been made with username and passwordWhen you click the "Next" button, a secure verification code will appear, and a security key will be sent to your email, which you will need to enter in the corresponding field.

Version: 1.10 September 2025

Finally, to complete the correction submission process, you will need to click the "Sign and Submit" button.

Bidders may download proof of registration for submitting correction documentation at any time from the "Proof of Correction Documentation" option in the corresponding envelope, which will be enabled in the tender submission details sheet.

Once the process for submitting correction documentation is complete, an electronic notification will be automatically sent to the bidder who submitted the correction documentation, informing them of the registration of the documentation.
